PRODUCT PRESENTATION —

Kidgoo 2

One for all and everything:

THE KIDGOO IS THE MULTI-TALENT IN THE QERIDOO WORLD

Maximum safety with full comfort? Extra storage space? Various operating modes? Yes, yes and yes! The Kidgoo is perfect for you if you don't want to compromise - because it simply offers you all the features that a modern children's stroller should have. The agile multi-talent already stands out in the basic equipment with additional comfort and safety features that make your everyday life simply more beautiful and beautifully simple. The reinforced aluminum frame with a low center of gravity ensures a safe road holding, the leaf spring damping system is as a perfect complement your guarantee for a pleasant and low-vibration transport. Ride your bike into town, use it as a stroller, stow your groceries and then head home - the Kidgoo is there!

You like to be here today, there tomorrow? That's not a problem either: the Kidgoo can not only be stored in a space-saving way and taken along in the trunk of your car, for example, the tow bar with quick-change function and universal coupling also makes it ready for use in no time for everything you want to experience. The 360° air-filled buggy wheel can be used as a jogging wheel simply by locking the mode switch. The possibilities are endless: cycling on the road, hiking off-road or off into the snow, the Kidgoo is your reliable companion for every adventure with its large, optionally available range of accessories.

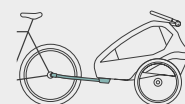

You want your baby with you? Then the Kidgoo is also perfect for your family as a stroller thanks to the separately available baby shell. Even the very smallest from the first month can come along in buggy mode, and from the third month of life it's already „with you in the trailer“! Convince yourself of the many perfectly thought-out details: Whether it's magnetic latches that let you open the trunk silently when your kids are sleeping, the height-adjustable handle that acts as a roll bar when in trailer mode, or the unique head protectors that provide a side safety margin that is not only practical but unrivaled in safety - Qeridoo has thought of everything.

Only one question remains: What do we do first?
